HYPERBARIC OXYGEN THERAPY

MATTHEW HARRIS, PA-C

I _____ hereby authorize Matthew Harris, PA-C and the staff at Rocky Mountain Hyperbaric Institute to provide hyperbaric oxygen therapy for me or my _____ (patient relationship).

I acknowledge that I have been informed of and understand the nature of the procedure, including the process involved, the associated risks, and the potential side effects of hyperbaric oxygen therapy. I understand that hyperbaric oxygen therapy is regarded as a primary treatment modality for certain conditions and is accepted by the American College of Hyperbaric Medicine. However, I further understand that the particular use of hyperbaric oxygen therapy for my condition may be considered "investigational" and may not be generally accepted within the mainstream medical community. I acknowledge that I have been advised of the potential risks and side effects of hyperbaric oxygen therapy, including, but not limited to, the following:

01 POTENTIAL RISKS & SIDE EFFECTS

Barotrauma to the ears and/or sinuses; otitis (fluid in the ears) - I understand that pressure changes can result in mild to severe pain in the ears, sinuses, or teeth. Middle ear barotrauma is the most common adverse effect. I have been explained the pressure equalization techniques and if I feel any pain or discomfort, I will alert the staff immediately.

Cerebral Air Embolism and Pneumothorax/Pulmonary Over Pressurization - I understand that decompression is performed slowly and in a controlled manner to reduce the risk of this occurring, and that I must breathe normally, remain relaxed, and not hold my breath during decompression.

Confinement Anxiety (claustrophobia) - I understand I may experience some claustrophobia in the chamber and will alert the staff if this should occur.

Fire Hazard (extremely remote possibility) - I understand that there is a remote risk of fire in the hyperbaric chamber, and I agree that I will not bring any prohibited items into the chamber. If I am unsure whether a particular item is permitted, I will ask a technician before bringing it into the chamber.

Oxygen Toxicity Seizures - I have been explained the rare risk of oxygen toxicity and understand that treatment protocols will be implemented to reduce the risk of this from occurring.

Temporary Visual Changes (nearsightedness) - I understand the possibility of temporary visual changes.
